MEDIA COVERAGE OF THE TRANSFER OF ENERGY INFORMATION WORKSHOP FOR SCIENCE TEACHERS OF CXC AND CAPE EXAMINATIONS Tuesday October 16th, 2007

The Ministry of Energy and Energy Industries and the Ministry of Education in association with the Caribbean Energy Information System (CEIS) are hosting a workshop entitled Transfer of Energy Information for Science Teachers on Tuesday October 16th, 2007 at the Preysal High School from 8:30 am – 2:00pm.

This workshop is designed to educate over 125 teachers of Energy and Energy-related subjects in schools and training colleges on matters relating to the high cost of energy and the socio-economic impact. It will also provide teachers of Energy and Energy-related subjects with the basic knowledge and skills required to effectively institute and strengthen energy conservation and efficiency as part of the National Science curriculum. The workshop will furthermore encourage the local school community to become actively involved in energy conservation and energy efficient programmes that are designed to reduce overall energy consumption as well as decrease the negative impact of fossil fuels on the environment.

To this end, members of the media are asked to attend and cover the event. The presenters are from the Caribbean Energy Information System/Scientific Research Council, Jamaica.

We look forward to your presence at this event.
