Other Data

FTG Survey

PRODUCT	DESCRIPTION	FORMAT
ArcGIS Maps	ArcMap .mxd file containing all data grids from the FTG survey and public domain, all interpretation results and georeferenced public domain maps and associated digitised locations of seismic, wells and oil and gas fields.	.MXD
ARKeX_ Interpretation	Shapefiles of the interpretation of mud diapirs and structural elements/possible leads for both near-surface and shallow plays, and deeper possible Cretaceous plays (containing attributed comments and data sources used to make the interpretation of each structure / lead).	.SHP
DEM Data	Topography data acquired during the FTG survey, referenced both to flight height (Ellipsoid) and to mean sea level (Geoid), and drape surface/clearance surface flown by the aircraft, linked to the ArcGIS project and as separate ascii/xyz grids.	.ASC, .TIF
Final Report	Digital versions of the final report for each stage of the FTG survey process: acquisition, data processing and interpretation.	.DOCX, .PDF
GIS Data	Shapefiles of flight lines flown as part of the FTG survey, the outline of the survey data, Concession and oil/gas field outlines, well locations and 2D/3D seismic/public domain sections.	.SHP
Gravity Data	Data grids of the preliminary and final gravity and gravity gradient data from the FTG survey. Shapefiles within the 'GIS' folder contain depth estimate results for each grid they were performed on.	.ASC, .TIF, .SHP
Magnetic Data	Data grids of the preliminary and final magnetic data acquired as part of the FTG survey, provided both in grid format and as raster datasets linked to the ArcGIS project. Shapefiles within the 'GIS' folder contain depth estimate results for each grid they were performed on.	.ASC, .TIF
Move	Initial Move project containing all georeferenced images and public domain sections, used to correlate faults as part of the structural element interpretation.	.MOVE
OpendTect	OpendTect project, which houses the initial XField 2D gravity models for some of the public domain sections.	.XF2
Presentations	PPT presentation of the talk given by ARKeX at the 20 th Caribbean Geological Conference in Port of Spain in May 2015	.PPTX

Public Domain Data	Public domain gravity and magnetics, georeferenced maps from published literature, and SRTM topography data, provided both in grid format and as raster datasets linked to the ArcGIS project.	.ASC, .TIF
References	Copies of all published literature and internet resource documents downloaded as part of the geological/play research that went into the interpretation project.	.PDF
